

Things Are Heating Up At Alina Residences

Two New Spa Services Add Extra Luxury

BY SUSAN MILLER MARCH 24, 2023

We all need to find ways to de-stress. Now, those living at Alina Residences Boca Raton have two new spa facilities that will help them decompress, whether it's from a long day at the office or chasing the kids around the house.

EI-Ad National Properties announced the addition of spas featuring hydrothermal experiences for the two buildings in phase two — Alina 210 and Alina 220. The new spas complement the spa located in the sold-out phase one building (Alina 200) by adding unique amenities that allow residents to create their own thermal circuit.

Guests can move through the various steps of the circuit: There are saunas that allow them to adjust temperature and humidity, along with three new shower experience programs — Cold Mist, Caribbean Rain and Atlantic Ocean. Each varies in length, water temperature, ambient lights and sound.

Exclusive to the 30 residences at Alina 210 is a soak in the vitality pool, while The Alina 220 spa offers a body scrub option with ice from the ice fountain. Think rolling in the snow after a thermal treatment — much like the Finnish tradition. Brrrrrr!
